

Access by Android

 If your device is on Android 12.x.x version, also check the information at the end of this guide

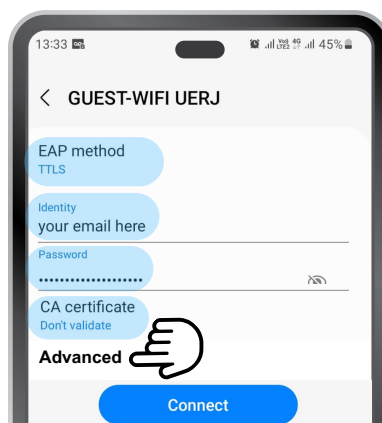

- 1 Drag your device's screen from top to bottom to access the *Wi-Fi Connections* icon

- 2 If it's already active, press until you open the available connection options and select **GUEST-WIFI UERJ**

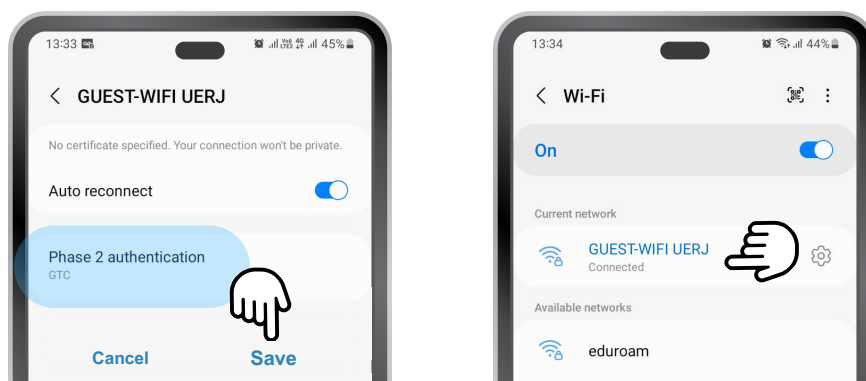

- 3 Change **EAP Method** to **TTLS**, then type your credentials for the **GUEST-WIFI UERJ** network (e-mail and password registered at the [portal](#)). Under **CA Certificate**, choose **Don't Validate**, then click **Advanced**

4

Under **Phase 2 Authentication**, select **GTC**. Press **Save**. Going back to the previous screen, press **Connect**

i That's it! You are now connected to the **GUEST-WIFI UERJ** network

i **Additional settings for devices running Android 12.x.x:**

Depending on the version of your Android device with Android 12.x.x (only Android 12+) the GUEST-WIFI UERJ network will not connect with the configuration above. We request that you make the following changes:

- **CA certificate:**

Use system certificates

- **Online certificate status:**

Do not validate

- **Domain:**
