

Access by iPhone

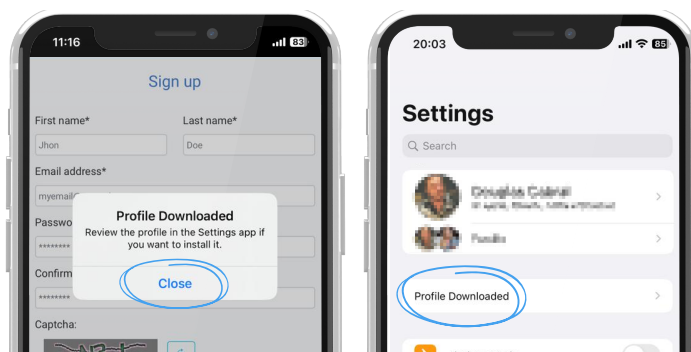

1

From your iPhone, download the configuration profile for the **GUEST-WIFI UERJ** network. A window will open asking for permission to download, click **Allow**. Can be requested which device you want to install the configuration profile on. In this case, click **iPhone**. If you are not asked, proceed to Step 2

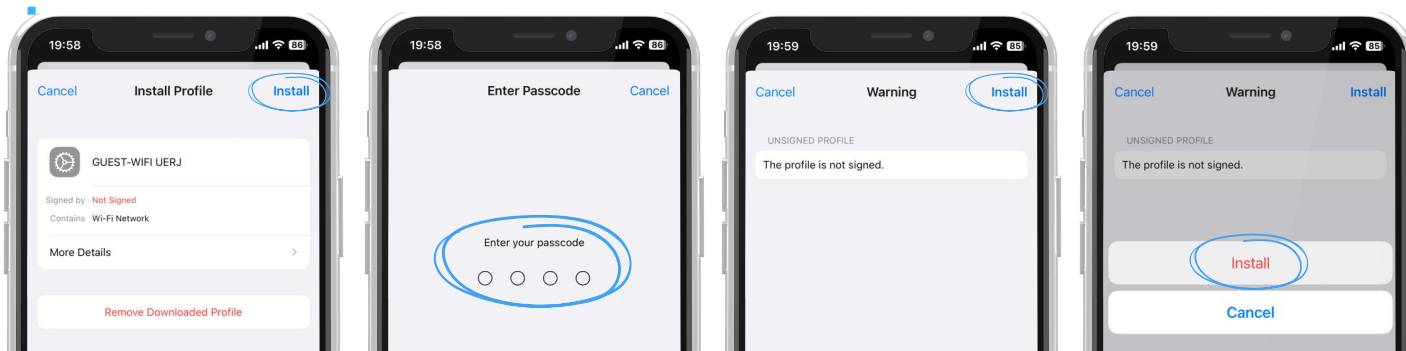

2

The configuration profile will be downloaded. Click **Close**, open the *Settings* app  then click **Profile Downloaded**

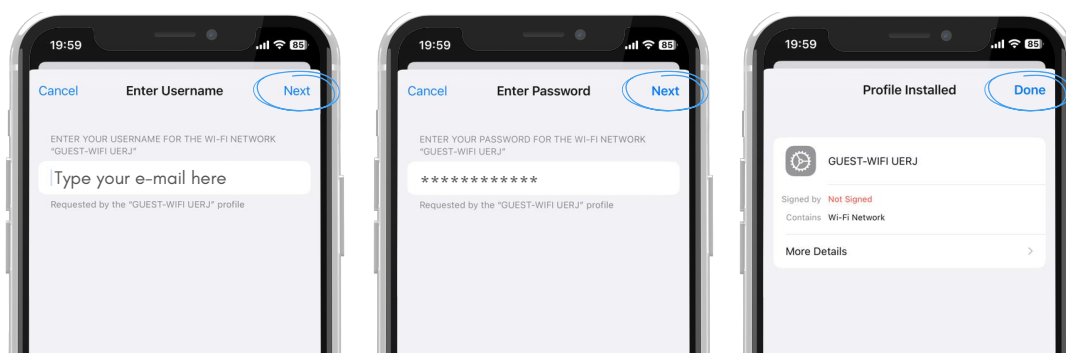

3

A window will open automatically for the profile installation, click **Install**. Can be requested your device's passcode, type it. A warning window will be shown, click **Install**. A new message will appear, click **Install** again

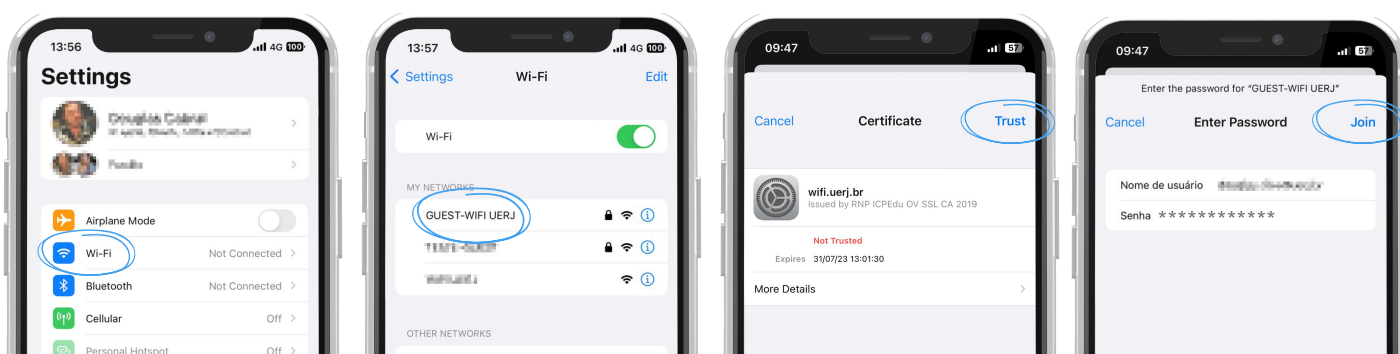

4

Your username will be requested, **type your registered e-mail at the guest's signup page**, then click **Next**. Your password will be requested too, type it then click **Next** again. Once this done, the profile will be installed! Click **Done**

5

Open the *Settings app* again  then click  **Wi-Fi**. A list of available wireless networks will be shown, click **GUEST-WIFI UERJ** network, then click **Trust**. At the next displayed window, type your registered password again then click **Join**

That's it! You are now connected to the **GUEST-WIFI UERJ** network
